DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. Applicant's Request for Continued Examination dated April 24, 2006 has been entered.

Priority

2. Priority of the filing date of the parent application is DENIED, as the present claims lack basis in the parent.

Double Patenting

3. Claims 1-23 remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,655,140 for the reasons of record in the previous office action.
4. Claims 1-18 and 20-23 remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,428,720 for the reasons of record in the previous office action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-3 and 6-23 remain rejected under 35 U.S.C. 112, first paragraph, for the reasons of record in the previous office action.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-5, 8, 10-15, 22 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *1998 International Refrigeration Conference at Purdue*. See the second composition in Table I, which consists of 59.9% pentafluoroethane, 35.8% 1,1,1,2-tetrafluoroethane and 4.3% butane. Apparatus and process of use claims are drawn to the disclosed use of the composition and may be fairly inferred. Regarding claim 15, refrigerant gases always contain some amount of impurity.

Claim Rejections - 35 USC § 103

9. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

10. Claims 1-20, 22 and 23 remain rejected under 35 U.S.C. 103(a) as being unpatentable over WO 96/034,473 for the reasons of record in the previous office action.

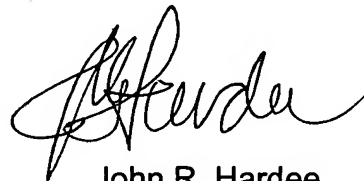

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through
